

If you want to purchase a Tzamos Jewels ring and you are not sure about your finger number, please follow one of the following alternative ways to easily find your number.

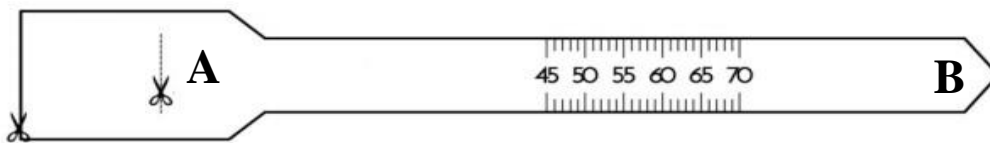

Just before you start the process, make sure that the print settings are correct. You have to check that the "Customize to Page" on the print table is not enabled. Choose vertical portrait orientation and normal margins in the print settings, and then print the following file.

You can be certain that the file is printed correctly if you measure the following sample with a ruler and your measurement is 4.5 cm.

1st method

- Cut out the ring sizer
- Cut a slit for Slot "A"
- With the numbers facing out, wrap the sizer around the finger on where the ring will be worn.
- Pull the pointed end Tab "B" through Slot "A" until the sizer is very snug.
- Measure your knuckle the same way following the previous steps.
- The larger of the two numbers aligned with Slot "B" is your ring size.

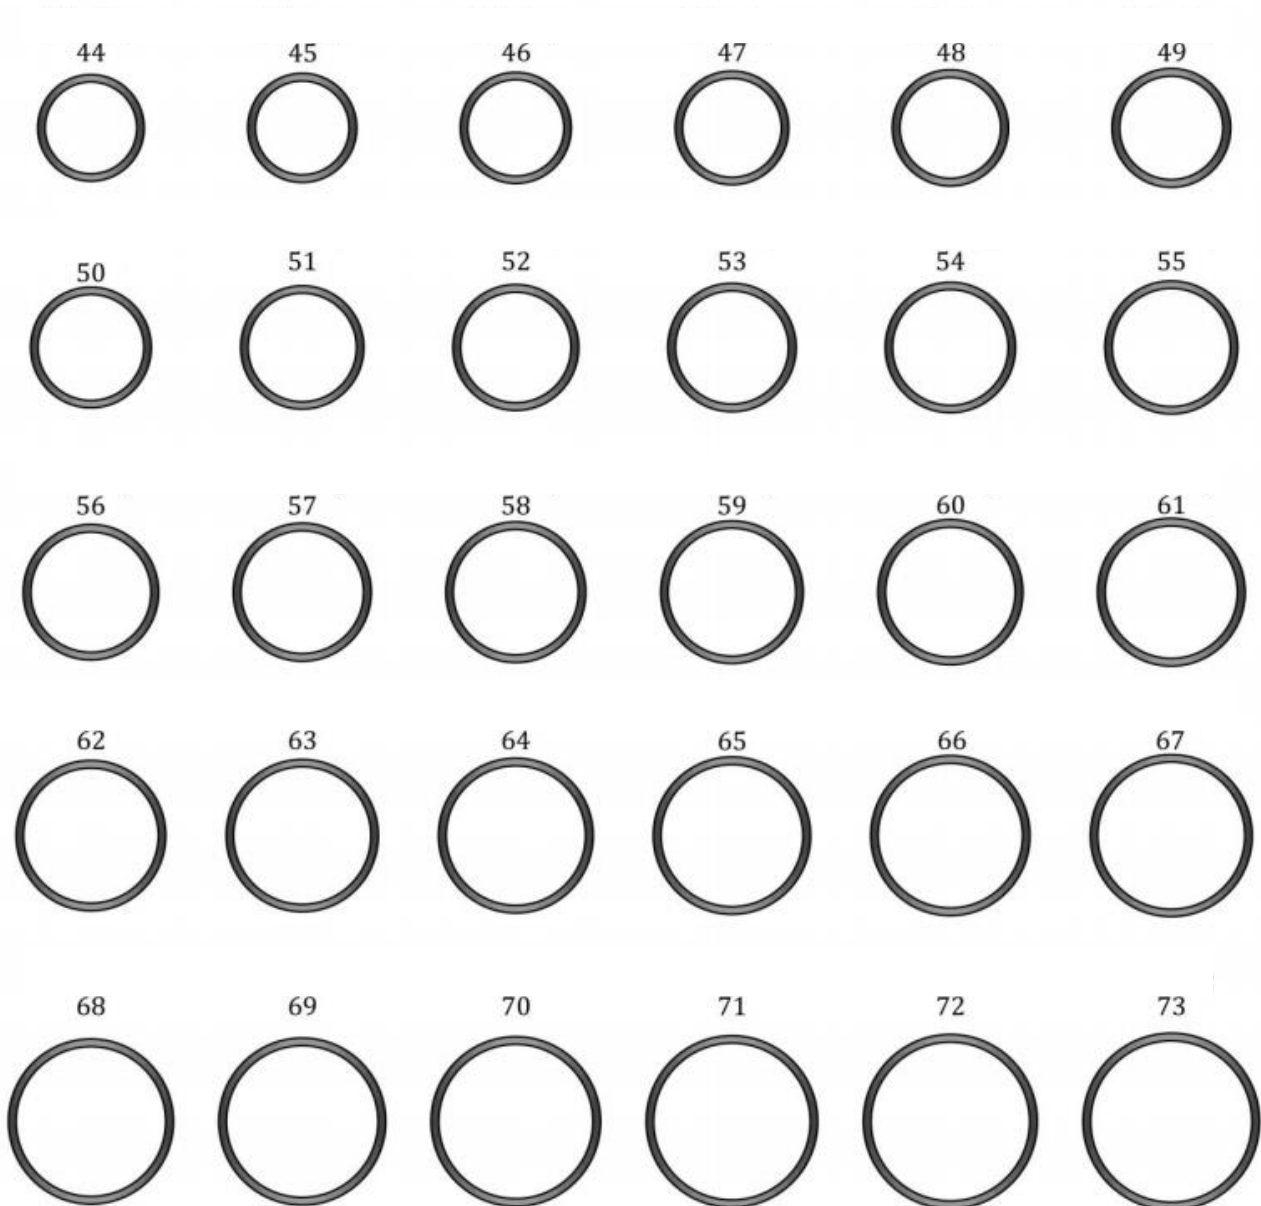

2nd method

One more method to find the number of your ring is to compare the ring you wear often. Use a ring that you wear on the same finger as the *Tzamos Jewels* ring you are interested in.

Place the ring on the circles in the image below, until you find the one that fits inside the ring, without overlapping it.

- Our company, Tzamos Jewels, does not take any responsibility in case of a wrong measurement of your ring size. These ways are to help you to find your ring size approximately and in no way they replace the measurement of your ring size in our store.
- Most of the rings are immediately available at numbers 53-54-55. If you have different size, there may be a delay in delivery due to the time it takes for the ring to adjust to your number.
- For sizes larger than 60 there may be an additional charge.
- In any case we will contact you right after you complete your order.
